# Command Reference: RemoveFile()

## Remove a file

Version 08.16.04, 2008-09-23

The `RemoveFile()` command removes a file from the file system. This command is used in testing software to remove results files before attempting to regenerate the results.

The following dialog is used to edit the command and illustrates the syntax for the command.

RemoveFile

**RemoveFile() Command Editor**

The command syntax is as follows:

```
RemoveFile (Parameter=Value,...)
```

#### Command Parameters

Parameter	Description	Default
InputFile	The name of the file to delete.	None – must be specified.
IfNotFound	Indicate action if the file is not found, one of: <ul style="list-style-type: none"><li>Ignore – ignore the missing file (do not warn).</li><li>Warn – generate a warning (use this if the file truly is expected and a missing file is a cause for concern).</li></ul>	Ignore

The following example command file illustrates how to remove a file:

```
RemoveFile ( InputFile="Results/output.dv" )
```
