# Command Reference: SetPatternFile()

Set the pattern file to be used with FillPattern() commands
Version 08.16.04, 2008-09-19

This command has been replaced with `ReadPatternFile()` – TSTool will automatically convert the command.

The `SetPatternFile()` command specifies a pattern file to be used with `FillPattern()` commands (see the `FillPattern()` command for more information).

The following dialog is used to edit the command and illustrates the command syntax.

SetPatternFile

SetPatternFile() Command Editor

The command syntax is as follows:

    SetPatternFile(PatternFile)

Command Parameters

Parameter	Description	Default
PatternFile	The path to the pattern file, which can be absolute or relative to the working directory. The **Browse** button can be used to select the pattern file (if a relative path is desired, remove the leading path after the select).	None – must be specified.

A sample commands file is as follows:

```
SetPatternFile("fill.pat")
```

This page is intentionally blank.
