# Command Reference: WriteProperty()
Write a time series processor property to a file
Version 08.15.00, 2008-05-11

The `WriteProperty()` command writes the value of a time series processor property to a file. This is useful for testing that properties are being set. It could also be used to pass information from TSTool to another program. The format of the output is:

```
Property="Value"
```

The following dialog is used to edit this command and illustrates the syntax of the command.

WriteProperty() Command Editor

The command syntax is as follows:

```
WriteProperty(Parameter=Value,…)
```

Command Parameters

Parameter	Description	Default
OutputFile	The property file to write, as an absolute path or relative to the command file.	None – must be specified.
PropertyName	The property name to write	None – must be specified.
Append	Indicates whether the property should be appended to the file (True) or overwrite the file (False).	True

A sample command file is as follows:

```
WriteProperty(OutputFile="Results/Example_WriteProperty.txt",
  PropertyName="WorkingDir")
```
